Attention: Connie Bruins, Project Compliance Manager

Dear Ms. Bruins:

My schedule will not permit me to attend the Inland Energy Center Project Modification Workshop in Perris on April 12, 2005. However my family and I wish to express our support for the proposed modifications. Our support is based on the reasons set forth in our letter of January 22, 2002, a copy from the Record is attached. In addition, the equipment to be used in the proposed new configuration and the increased generation to 810 megawatts is a further basis for approval of the project as modified.

Thank you for your consideration in this matter.

Very truly yours,

  
William Sweeney

Attention: Mr. Jim Bartridge, Hearing Officer

Dear Mr. Bartridge:

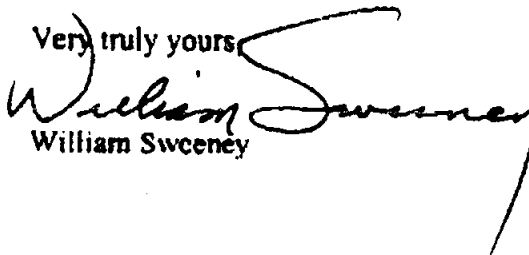

My family members have been property owners in Riverside County since the early 1900s. We have been active in support of that which benefits the area and equally active in opposition to that which is detrimental to the area. With respect to the Sun Desert transmission lines, we very active as to where the lines were cited.

This letter is in support of the Inland Empire Energy Center.

The generating facility is located in an industrial area. The location is South and upwind from our properties. The prevailing wind is to the North toward our properties and we have concluded that because of the choice of generation method that there is no adverse effect. Transmission lines have been a sensitive issue both to property owners and the environmental community. Because of its location, this facility has perhaps a thousand yards of new transmission lines to existing lines.

In these turbulent times of energy need and financing difficulty, we ask that you favorably recommend the Inland Empire Energy Center.

Very truly yours,

  
William Sweeney

RE: The Inland Empire Energy Center

Dear Mr. Bartridge:

The City of Moreno Valley continues to fully support the Inland Empire Energy Center (IEEC). The IEEC is a 775 Megawatt gas turbine combined cycle system to replace the 670 Megawatt energy generation facility constructed in the unincorporated community of Romoland.

The City of Moreno Valley urges the California Energy Commission to grant full approval of the construction and operation of the IEEC. If you have any questions, please contact Prem Kumar, Assistant City Engineer at (951) 413-3020.

Sincerely,

Gene Rogers  
City Manager

Dear Ms. Bruins,

I understand that you are extremely busy and by no means do I want to take up your time, thus I will make this letter short and to the point.

I was recently informed about the fact that there is an issue being presented before the California Energy Commission concerning Calpine's previous request for the Inland Empire Energy Center. I am writing in order to show my support for the approval of the request.

I was not sure if a petition would suffice, thus I drafted a general letter and circulated it to my neighbors, colleagues, and residing friends working in the area that would be affected by the *Inland Empire Energy Center (IEEC)*.

The Inland Empire, Riverside County, in general is vastly growing and the *Inland Empire Energy Center* is exactly what this area needs in order to keep up with the growing markets. The IEEC will encourage more businesses to locate in Riverside County, creating higher paying jobs by businesses coming from other locations. Higher paying jobs will then increase the future of the county.

Please do not let this opportunity slip through the cracks. I strongly urge you to join me in supporting and approving the proposed 670-megawatt power plant.

Thank you for your consideration,
